The Kenco In-Cup concept...

With Kenco In-Cup the cups come pre-dosed, stacked and hygienically sealed, eliminating the need for loose ingredients. Just stack the cups into the machine and you are ready to serve great quality Kenco In-Cup drinks in fully branded paper cups.

The machine just adds hot water to mix the pre-dosed product in your branded paper cup.

At the Kenco Coffee Company we pride ourselves on ensuring that we source high quality beans to make our coffee blends.

All Kenco In-Cup coffee is freeze dried to lock in taste and ensure the highest quality flavour and aroma. The great news is that we now source 75% of the beans for our entire freeze dried Kenco coffee range from Rainforest Alliance Certified™ farms.

Our goal by 2010 is to convert all Kenco products to using only beans sourced from Rainforest Alliance Certified™ farms so we can provide you and your customers the choice of an ethically sourced product without any compromise on quality or price.
